- 3-11: Combinations**
 - 1 spot: Bronze**
 - 2 spots: Silver**
 - 3 spots: Gold**
- 12-18: Bronze**

The International Mine Water Association (IMWA) provides a forum for international discussion on mine water and mine water issues.

The IMWA 2017's Congress theme is Mine Water & Circular Economy. Related to mine water, this means that mining wastes and mine water are used to extract valuable materials, such as metals, fertilizers or adsorbents for waste water purification.

The Congress will also focus on the experience that mining companies, researchers and stakeholders have gained in highly vulnerable northern environments. There will be nine main topics in the Congress, so that we can cover the mine water field thoroughly.

Currently we have received 235 abstracts, and are expecting 300-330 delegates from 35 countries.
